## How to Use This Booklet to Assign Water Point Identification Code:

Assuming that a contractor or a driller is to install a Shallow Tube Well with No. 6 Pump in SULTANPUR village BEMARTA union of BAGERHAT SADAR uapzila in BAGERHAR district. This water point will be installed in year 2010 by a GOB-Unicef project. The site of installation is a bazaar.

The steps to assign water point code (Figure 1) are as follows:

|          |          |          |          |          |          |          |          |          |          |          |          |          |          |          |          |          |          |          |          |          |          |

|          |          |          |          |          |          |          |          |          |          |          |          |          |          |          |          |          |          |          |          |          |          |

*Figure 1: Format of Geocode Based Water Point Identification Code*

**Step 1:** Write water point year of installation as the first 4 digits indicated by YYYY. For this example, it is 2010.

**Step 2:** Select land use type (R) code from Table R (page no. 4). For this example, a bazaar for rural commercial purpose, so it is 4.

**Step 3:** Select water point type of ownership (OO) from Table OO (page no. 4) . For this example, it is 05.

**Step 4:** Select water point type (WW) code from Table WW (page no. 5). For this example, water point type is Shallow Tube Well with No. 6 Pump. Therefore its code is 01.

**Step 5:** Assign district (ZZ), upazila (TT) and union (UUU) GEO Code for water point. The GEO codes are as follows: for BAGERGAT district, ZZ is 01; for BAGERHAR SADAR upazila, TT is 08; and for BEMARTA union, UUU is 151.

**Step 6:** GEO codes for SULTANPUR village, VVV is 368.

**Step 7:** Assign 3 digits serial number (NNN). If this is the first water point installed at BEMARTA union in year 2010 then assign serial number (NNN)

as 001. Serial number should be used only once in a fiscal year. The second water point installed by any projects, regardless of the type, as long as it is in the same union, it will receive a serial number of 002.

The completed water point identification is as follows (Figure 2):

|          |          |          |          |          |          |          |          |          |          |          |          |          |          |          |          |          |          |          |          |          |          |
